PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience shipping production-grade cross-platform mobile applications for Android and iOS. Delivered six live apps with 100,000+ combined downloads and a 4.7-star flagship rating, spanning job discovery, fintech, event management, biometric attendance, and on-demand services. Strong in Clean Architecture with BLoC and GetX, Firebase, RESTful APIs, real-time WebSocket and STOMP, offline-first storage, and on-device machine learning using TensorFlow Lite and Google ML Kit.

CORE SKILLS

Programming Language: Dart

Framework: Flutter (Cross-platform Android and iOS)

State Management: BLoC, GetX

Architecture: Clean Architecture, SOLID Principles, MVVM, Reusable Components, Responsive UI

Networking: RESTful APIs, Dio, JSON Parsing, Token-based Authentication, Interceptors

Firebase: Authentication, Cloud Firestore, FCM, Dynamic Links, Analytics, Crashlytics

Authentication: Phone OTP, Google Sign-In, Apple Sign-In, JWT, Biometric, Secure Storage

Local Storage: Hive, Floor (SQLite), Shared Preferences

Native Capabilities: Google Maps, Geolocator, Camera, ML Kit, TensorFlow Lite, Image Picker, Image Cropper

Real-time and Push: WebSocket (STOMP), FCM, Local Notifications, Deep Linking (Dynamic Links, app_links)

Integrations: Razorpay, easy_localization, Lottie, Shimmer, share_plus

Tools and Deployment: Git, GitHub, Android Studio, VS Code, Postman, Google Play Store, Apple App Store

WORK EXPERIENCE

Mobile Application Developer (Flutter)

Mar 2026 – Present

WinApp IT Solutions Pvt Ltd | Chennai, India

Face Recognition Attendance App — AI-powered multi-tenant attendance platform

- Built a multi-tenant attendance management application with face-recognition-based check-in and check-out, break tracking, and admin dashboards using Flutter and GetX architecture.
- Implemented on-device face recognition using TensorFlow Lite and Google ML Kit, enabling offline biometric verification with sub-second matching and zero server-side image storage for privacy compliance.
- Designed a Kiosk Mode for shared-device workplaces with employee selection, liveness-aware face capture, and automated check-in and check-out flows, eliminating manual punch-in fraud.
- Integrated geolocation-based attendance validation using Geolocator to enforce on-site check-ins within a configurable office radius, preventing remote and proxy attendance.
- Implemented an offline-first data layer using Hive local storage with connectivity-aware sync, ensuring uninterrupted attendance capture during network outages.

Mobile Application Developer (Flutter)

May 2025 – Feb 2026

TalentTurbo Technologies | Nagercoil, India

TalentTurbo App — job discovery and referral platform

- Architected and shipped a production-grade job discovery platform serving active users across Android and iOS, owning end-to-end delivery from requirements gathering to Play Store releases (currently on v1.0.7).
- Designed and implemented a multi-channel authentication system (Email and Password, Mobile OTP, Google Sign-In, Forgot Password recovery) with secure token persistence, session refresh handling, and a centralized API authorization layer.
- Led development of the Refer and Earn rewards engine with unique referral code generation, real-time status tracking, and a rewards dashboard, contributing to measurable growth in organic user acquisition.
- Engineered deep linking infrastructure using Firebase Dynamic Links and app_links, enabling seamless redirection from shared URLs, push notifications, and email campaigns directly into job detail and referral screens, improving user re-engagement.
- Optimized app bundle size and runtime performance during the v1.0.7 release cycle. Reduced APK size, fixed memory leaks in image-heavy lists using cached_network_image and shimmer placeholders, and improved cold start time.

BellyButton App — real-time event management and photo-sharing platform (App Store)

- Architected and shipped BellyButton (v1.0.2+8), a real-time event management and photo-sharing application built with Flutter, GetX state management, and Clean Architecture spanning 26 feature modules and 30+ reusable widgets.
- Implemented secure Phone OTP authentication with SMS auto-read (smart_auth), JWT token lifecycle management, and centralized authorization via Dio interceptors with automatic session-expiry handling.
- Built end-to-end event lifecycle including timezone-aware creation, multi-step wizard with review and confirm flow, contact-based invitations with smart filtering and duplicate detection, and native device calendar sync via device_calendar with Hive-persisted mappings.
- Developed advanced photo features: WhatsApp-style multi-capture camera, Instagram-style auto-playing slideshow with screenshot protection (screen_protector), and a face-filter carousel for filtering photos by event members.
- Engineered real-time updates via STOMP over WebSocket and Firebase Cloud Messaging push notifications across foreground, background, and terminated app states, with rich in-app notification overlays.

HomieFix App — home service booking platform

- Developed a scalable home service booking application with real-time service availability, dynamic pricing, and instant booking confirmation using Flutter and BLoC architecture.
- Built Refer and Earn feature with unique referral code tracking and coupon validation logic, improving user acquisition and engagement.
- Designed and implemented a Welcome Coupon system with expiry validation, usage limits, and server plus client-side eligibility checks.
- Integrated Razorpay payment gateway for secure in-app transactions with post-payment order verification, ensuring reliable payment success tracking.
- Added multi-language support (English and Tamil) using easy_localization, enabling improved accessibility and user experience.

Mobile Application Developer (Flutter)

May 2024 – Apr 2025

Roriri Software Solutions Pvt Ltd | Tirunelveli, India

Gold Scheme App — gold subscription and investment platform

- Implemented a secure online payment module using Razorpay, ensuring seamless transactions with encrypted processing and real-time payment validation.
- Integrated RESTful APIs with Dio for user authentication, gold scheme subscription plans, and transaction history, with efficient request handling and structured error responses.
- Developed a real-time Gold Rate Chart using FL Chart, enabling users to track daily price fluctuations with smooth animation and optimized data visualization.

Flutter Developer Intern

Apr 2024 – Jun 2024

Amshuhu iTech Solution Pvt Ltd | Chennai, India

Mvaahna App — garage and vehicle service management platform (App Store)

- Built feature screens for vehicle service tracking, customer management, and appointment scheduling using Flutter and GetX, contributing to a production garage management application under senior developer mentorship.
- Implemented multi-language support across 8 Indian languages (English, Hindi, Tamil, Telugu, Malayalam, Kannada, Marathi, Gujarati) using easy_localization, expanding accessibility for regional users.
- Integrated Google Maps and Geolocator with reverse geocoding to capture garage and customer locations, alongside image_picker and image_cropper for capturing vehicle service photos.

KEY ACHIEVEMENTS

- Shipped 6 production Flutter apps across Google Play Store and Apple App Store with 100,000+ combined downloads.
- Achieved a 4.7-star user rating on TalentTurbo through performance optimization, clean architecture, and polished user experience.
- Architected an offline-capable face recognition attendance system using on-device TensorFlow Lite and Google ML Kit. Sub-second biometric verification with zero server-side image storage for privacy compliance.
- Owned end-to-end Flutter delivery from requirements gathering through Play Store and App Store releases, including viral referral and event-sharing systems built on Firebase Dynamic Links that measurably grew user acquisition.

EDUCATION

B.Com with Computer Application, A.V.C. College (Autonomous), Tamil Nadu, India May 2020 – May 2023

LANGUAGES

Tamil, English
